

Auto Flow Station

Key Features

- Fully Automatic
- Available in 1 to 3 Oxygen Gas configuration (i.e LMO, PSA O₂ gas, Cylinder gas)
- Auto flow balancing system
- Highly accurate Pressure Sensor will continuously monitor the Hospital Pressure Network
- Provide super-fast access to the pipeline in case of low pressure or any other malfunction
- Integrated alarm modules with mimic displays
- No interruption of O₂ Flow even during Power Failure

Technical Specification

Model	Features
AFS21	2 Inputs and 1 Output
AFS31	3 Inputs and 1 Output
AFS32	3 Inputs and 1 Output with flow Measurement

Power Input 230 V +/- 50 Hz AC
